* HMI cannot use CAN bus if CODESYS feature is activated!

* Add a [Weintek Built-in CODESYS] device to communication with Built-in CODESYS.

Project description:

*SCADA software and Built-in CODESYS can access device data via MODBUS TCP/IP Server on HMI. (Add a MODBUS TCP/IP Server first and enable [MODBUS TCP/IP Gateway])

*Built-in CODESYS must use internal IP (10.255.255.1) to access local MODBUS Server.
